Auto-Continuum™ Systems

Industrial Automation
Construction equipment
Automotive components
Recreational vehicles
Farm machinery
Office furniture
Mining machinery

Processes
Advanced MIG processes:
Versa-Pulse®
Accu-Pulse® MIG (GMAW-P)
RMD®
MIG (GMAW)
High-deposition MIG (GMAW)
Flux-cored (FCAW)

Input Power
Auto-Line™ 230–575 V
3-phase, 50/60 Hz

Rated Output at 104°F (40°C)
350: 350 A at 31.5 V, 100% duty cycle
500: 500 A at 39 V, 100% duty cycle

Output Range
350: 20–400 A, 10–44 V
500: 20–600 A, 10–44 V

Quick Specs

Take your welding to the next level.

Next generation automation welding solution delivers advanced arc performance to improve throughput and weld quality.

The Auto-Continuum system features an adaptive arc with less spatter and improved gap handling, providing increased travel speeds and high-quality welds on a variety of base materials. Simple integration with fixed and flexible robotic systems.

Insight
Integrated Welding Intelligence™ solutions. Delivers information to measure and improve your welding operation. See page 4 for more information.

Auto-Continuum 350 and Auto-Continuum wire drive motor assembly shown.

Power source is warranted for three years, parts and labor. Original main power rectifier parts are warranted for five years.
More power. Better reliability.
For demanding industrial applications.

All-new power source design
Smart and powerful digital design has the fast response needed to deliver the most stable welding performance for better welding results.

Developed as a platform to meet current and future needs with integrated expansion capabilities.

Produces more power at higher duty cycles and temperature ratings than competitive models.
- More power maximizes reliability in demanding automation applications by keeping all internal components operating cooler regardless of the jobs to be done.
- More power ensures better welding results regardless of application or weld process.

Auto-Continuum 350: up to 26% more weld power
11,000 watts versus 8,700 watts = 2,300 watts more!
(Continuum: 350 A x 31.5 V at 100% duty cycle = 11,000 watts)
(Competitor: 300 A x 29 V at 100% duty cycle = 8,700 watts)

Auto-Continuum 500: up to 18% more weld power
19,500 watts versus 16,425 watts = 3,075 watts more!
(Continuum: 500 A x 39 V at 100% duty cycle = 19,500 watts)
(Competitor: 450 A x 36.5 V at 100% duty cycle = 16,425 watts)

All-new wire drive motor assembly
New low-inertia motor provides faster response for the best arc starts with the least amount of spatter.

Reduced-weight design allows for quicker point-to-point arm movement and provides improved servo motor life.

- Easy communication from robot and power source
- New wire drive motor assembly design utilizes common Miller mounting configurations
- Designed for easy integration with fixed and flexible automation systems
- Integrates with major industrial robot brands
- Simple retrofit to existing automation systems

Easy to set up and install
Webpages are an easy way to initialize and configure your automation welding system.

Configure your robot settings to establish communication. Options include:
- EtherNet/IP™
- DeviceNet
- Analog

System status / event logs
- Access system logs to help identify weld cell issues
  (Example: can identify weld cable degradation)
Transform data into actionable information that drives continuous improvement.
Learn more at MillerWelds.com/insight

**Insight Core™ (Standard)**
Simplified, Internet-based welding information solution that reports cell productivity and weld parameter verification.
- Provides basic production metrics such as amps, volts, wire feed speed, arc on time and arc on time percentage

**Insight Centerpoint™ (Optional)**
Advanced, real-time feedback solution to ensure consistent weld quality.
- With built-in features like Part Tracking™ to detect a bad weld and Insight Reporter for preconfigured reports and management charts, Insight Centerpoint can help reduce rework costs and improve quality.

Part Tracking actively detects a bad weld when it happens to reduce rework and improve quality.
- Detected weld errors due to poor parts fit-up, bent torch (due to colliding with a part), part loaded incorrectly, etc.
- Centerpoint will shut the system down either during or after the weld, to alert and direct the operator to which weld(s) are out of parameter, reducing inspection time
- Repair can be done at the weld cell before paint, which significantly reduces the cost of rework and improves overall parts quality

Overall Equipment Effectiveness (OEE) — Centerpoint can provide data on weld cell efficiency.
- Robot on/off time
- Open cell door time tracking
- Duration of off time (due to parts shortage, fixture issue, etc)
**Flexibility**

**Fleet standardization.** Auto-Continuum can be used for both automation and hand-held applications. Note: To convert Auto-Continuum for manual weld applications, order feeder base (301431) and wire feeder drive (301216).

**Adaptable** to a variety of fixed and flexible automation configurations and requirements.

**Welding Intelligence™** Improve your welding operations by increasing productivity, improving quality and managing costs with Insight Core (standard) and Insight Centerpoint (optional) welding information management systems.

**Easily add new processes and custom programs** via the USB interface.

**Parameter flexibility** allows the system to be set for voltage and wire feed speed control, or for voltage and amperage control.

**Communication protocol options:**
- EtherNet/IP™
- DeviceNet
- Analog

**Ratings A, B, C, and D are relative values. An “A” rating indicates a best fit between your performance needs and process. A “blank” rating indicates that the process is not recommended for that application.**

**NEW! Versa-Pulse™**
- Fast, low-heat, low-spatter process — for high-speed automation on materials 1/4 inch (6.35 mm) and thinner
- Great for gap filling
- Shortest arc length/lowest pulse voltage for lower heat and lower spatter at higher speeds

**Accu-Pulse®**
- The most popular process for majority of industrial welding applications
- Most adaptive arc on 16 gauge (1.6 mm) and thicker
- Designed for all weld positions

**RMD®**
- Lowest heat process, best for gap handling
- Limited travel speed

**High-deposition MIG**
- Higher deposition rates than standard spray transfer on thicker materials
- Designed for welding applications in which spray transfer is preferred

**MIG (short circuit)**
- Lower spatter than traditional MIG welders
- Better arc performance with silicon bronze and coated materials
Modifying your welding processes to include Versa-Pulse and Accu-Pulse is an effective way of reducing fumes at the source. These processes reduce fume generation by up to 50 percent over traditional CV MIG.

**OSHA hierarchy of control**

1. **Process Modification/Substitution**
2. **Engineering Controls**
3. **Work Practice Controls**
4. **Personal Protective Equipment**

**Auto-Continuum™ System Features**

- **Tru-Feed™ technology** provides precise feeding operation for stable arc performance.
- **New low-inertia motor** provides faster response for the best arc starts with the least amount of spatter.
- **Balanced-pressure drive-roll design and tensioners** feed wire in its truest and straightest form for consistent feedability.
- **Spring-loaded Accu-Mate™ connection** prevents the gun from being pulled loose.

**Wind Tunnel Technology™**: Internal air flow that protects electrical components and PC boards from dirt, dust, debris — greatly improving reliability.

**Fan-On-Demand™** operates only when needed reducing noise, power consumption, and the amount of airborne contaminants pulled through the machine.

**Auto-Line™ power management technology** allows for any input voltage hook-up (230–575 V) with no manual linking, providing convenience in any job setting. Eliminates weld defects caused by dirty or unreliable power.

- **Control display** for easy reference of weld parameters.
- **Parameter flexibility** allows the system to be set for voltage and wire feed speed control, or for voltage and amperage control.

**Quick-change dual-bearing drive rolls** give you more consistent wire feeding.

**Drive rolls and guides are common** with other Miller industrial feeders (use existing, not new parts).

**Inlet guide installation is toolless.**

For All Auto-Continuum Models

ADAM D/I/O Module
- 300803 Provides a digital I/O interface for communication between a robot PLC and Auto-Continuum power supply. The interface allows for the interaction of a robot or PLC and the Insight Centerpoint™ application. This module is required for all DeviceNet and analog Auto-Continuum models to run Insight Centerpoint.

Wiring Guns
- Manual — see BernardWelds.com
- Automation — see Tregaskiss.com

Motor Control Cables
- 263368025 25 ft. (7.6 m)
- 263368050 50 ft. (15.2 m)
- 263368080 80 ft. (2.4 m)
- 263368100 100 ft. (30.5 m)

Includes overmolded connections on high-flex cables for optimal service life.

Volt-Sense Cable
- 242212050 Replacement 50 ft. (15.2 m) cable. One cable supplied with Auto-Continuum power source.

Ethernet Cables
- 300734 9.8 ft. (3 m)
- 300735 16.4 ft. (5 m)
- 300736 32.8 ft. (10 m)

Industrial-grade 360-degree-shielded Cat 5 Ethernet cable with conventional RJ45 overmolded four-pole connector on one end to connect to factory network, and industrial M12 overmolded connector on the other end to attach to Auto-Continuum power source. Cable supports 10/100 Mbits-per-second transmission rate.

Continuum Cooler
- 301214

For use with water-cooled torches rated up to 500 amps. Integrated coolant flow switch ensures coolant is flowing in the system. The Continuum cooler mounts to the bottom of the Continuum power source. Power is supplied via an internal connection with the power source.

Low-Conductivity Coolant
- 043810

Sold in cases of four one-gallon recyclable plastic bottles. Miller coolants contain a base of ethylene glycol and deionized water to protect against freezing to -37 degrees Fahrenheit (-38˚C) or boiling to 227 degrees Fahrenheit (108˚C). Also contains a compound that resists algae growth.

For Auto-Continuum with DeviceNet
**Typical Installations** *(Robotic/automation pulsed MIG or conventional MIG.)*

1. **Power Source**
   See page 12 for available models. Choose power source according to preferred communication protocol. Each power source includes a 50-foot (15.2 m) volt-sense cable.

2. **Robot Controller Connection (choose one)**
   - **EtherNet/IP** — Requires Ethernet cable. 16.4-foot (5 m) cable included with Auto-Continuum robotic MIG kit. See page 10 for individual cables.
   - **DeviceNet** — Requires DeviceNet communication cable. See page 10 for available cable lengths.
   - **Analog** — Requires DeviceNet communication cable. See page 10 for available cable lengths. Also requires DeviceNet to analog adapter (301427) and analog receptacle kit (see page 10).

3. **Auto-Continuum Robotic MIG Kit**
   Includes wire drive assembly and all cables, hoses and hardware for outfitting a robot arm. See description at right for details.

4. **Motor Mounting Bracket**
   See page 10 for available brackets. Motor mounting brackets from other brands must be supplied by robot manufacturer or system integrator.

5. **Tregaskiss Robotic MIG Gun**
   Must be ordered separately. Visit Tregaskiss.com for additional torch information.

---

**Auto-Continuum Robotic MIG Kit 301422**
Kit includes the following:
- Auto-Continuum wire drive motor assembly (left-hand drive)
- Flowmeter regulator with 50-foot (15.2 m) gas hose
- Two 50-foot (15.2 m) 4/0 weld cables with lugs
- One motor control cable
- One 16.4-foot (5 m) Ethernet cable
- .035/.045-inch V-groove drive roll kit with four drive rolls and necessary guides
- 30-foot (9 m) conduit assembly with quick disconnects
### Ordering Information

Note: As the technological advances offered by Auto-Continuum extend beyond the capability of Auto-Axcess™ systems, the two systems are not compatible. Auto-Continuum systems are designed to allow future upgradability, to expand with your operation’s needs.
